

Russian Ecological Bio-trade Center

- Novel bioactive compounds have wide range of commercial applications
- Russia is endowed with rich, highly diverse biological resources in a variety of environments
 - Geothermal
 - Pristine
 - Radioactive
 - Cryo-
 - Contaminated
 - Deep subsurface
- These resources have potential as valuable, useful products/services for global markets
 - Pharmaceutical
 - Chemical
 - Cosmetic
 - Biotechnology
 - Food
 - Agrochemistry
- Russian Ecological Bio-Trade Center will
 - ensure *conservation and sustainable use* of Russian biological diversity
 - coordinate negotiations/contracts for access to Russian biodiversity, ensuring *benefit-sharing agreements* that generate economic and scientific benefits for the participating Russian partners
 - act as *information clearinghouse*
 - provide project-directed *financial support*
 - coordinate *joint research* activities
